

WHERE CONVENIENCE MEETS FUNCTIONALITY

EZ-ACCESS ROLL-UP DOOR

Boat and RV storage represents an additional revenue source in today's self-storage industry. Larger spaces require bigger roll-up doors, and an innovative means of operation for today's tenant. US Door proudly introduces the EZ-Access Roll-Up Door, providing your tenant with ease of operation, while allowing you extra units out of every building. Every EZ-Access Roll-Up Door from US Door & Building Components includes a walk-through pedestrian door AND an easy to operate commercial sized roll-up door, All-In-One.

Call 1-877-USDOOR1 to learn how US Door can assist you to increase profitability of your new or existing self-storage facility.

Benefits:

- Tenants gain access to RV's and boats without lifting an over-sized commercial door from outside the unit.
- Standard reduced drive chain hoist on the roll-up door provides years of smooth trouble-free operation, while standing inside the unit.
- Release the dual-pin attachment on the full height swing door assembly, and the entire unit swings open revealing the larger clear opening required for many of today's full-size vehicles.
- Provides quick access to storage unit during inclement weather or power outage.
- Provides additional security by keeping the larger roll-up door closed until the entire opening is needed to move a vehicle in or out of the unit.
- Allows for economical sized units, conserving land for additional storage units.

US Door & Building Components is the trusted innovator in manufacturing of self-storage and commercial door products, fitting the unique aspects of any project.
